

Brambles delivers first year progress against its 2030 Sustainability Programme

Global logistics group and operator of CHEP publishes 2026 Sustainability Review

Sydney, 9 September 2026: Brambles today released its 2026 Sustainability Review, highlighting progress in the first year of its 2030 Sustainability Programme, which advances the company's vision to create regenerative supply networks.

Reporting on material sustainability issues and achievements for the year ended 30 June 2026, the review demonstrates early momentum against Brambles' broad range of targets across nature, business and communities.

Juan José Freijo, Brambles' Chief Sustainability Officer, said: "As we step into the next phase of our regenerative vision, we have focused on translating our ambition into clear strategies and frameworks that support accountability, transparency and delivery against these elevated sustainability goals."

Key achievements highlighted in the 2026 Sustainability Review include:

- Enabling **10,000 hectares of land regeneration** in South Africa's Upper uThukela catchment through a new partnership with WildTrust, which aims to protect and restore approximately 75,000 hectares over five years, contributing to Brambles' target to regenerate two hectares of land for every hectare required for its timber needs;
- Reducing absolute **Scope 1 and 2 emissions by 36%** and absolute **Scope 3 emissions by 16%** against a FY20 baseline, ahead of Brambles' validated science-based targets reduction trajectory;
- Substituting **50% of virgin plastic purchases** with circular materials or solutions (up from 41% in FY25), against Brambles' target of 80%;
- Engaging in **sustainability collaborations with 694 external partners** across customers, suppliers and NGOs (up from 637 in FY25);
- Issuing a record **7,440 Sustainability Certificates** to customers, more than double the 3,702 issued in FY25, recognising environmental benefits achieved by using Brambles' platforms instead of linear or single-use alternatives;
- Achieving a **10% improvement in Lost Time Injury Frequency Rate (LTIFR)** (0.9 in FY26 vs 1.0 in FY25) to deliver Brambles' best safety performance on record;
- Facilitating the **rescue of 880,863 tonnes of surplus food** using CHEP platforms, equating to 1.8 billion meals served to people in need; and
- Supporting local communities with **contributions totalling US\$8.84 million** through financial, in-kind donations and volunteering hours.

The review also showcases initiatives from across Brambles' operating regions that are supporting its regenerative ambition. These include efforts to protect biodiversity and endangered species in South Africa, collaborations with carrier partners on electric transport solutions in Australia, Mexico and Chile, and the deployment of Brambles' digital technologies to help customers protect produce quality and reduce food spoilage in Latin America.

"Climate change, resource scarcity and nature-related impacts are reshaping value chains and increasing the importance of resilience. Brambles is well positioned to respond by drawing on our leadership, collaboration and advocacy to promote the energy transition, advance circular solutions, and strengthen supply chain resilience," said Dr Freijo.

Sustainability leadership

Brambles continued to be recognised for its sustainability leadership in FY26. The company ranked #2 globally in the Commercial Services and Supplies category of the Dow Jones Best-in-Class World Index and was recognised in the S&P Sustainability Yearbook, having earned a Top 5% S&P Global Corporate Sustainability Assessment Score.

Brambles also maintained the highest possible AAA rating from MSCI and retained CDP 'A' rating for both climate and forestry.
