

Brambles ranks #4 in Corporate Knights' Global 100 list of most sustainable companies

CHEP parent company retains a top spot from 8,000+ assessed.

Sydney, 23 January 2025: Brambles has reaffirmed its leadership in sustainability, retaining a top five position in Corporate Knights' Global 100 for 2025.

Brambles was awarded #4 spot in the 2025 Global 100 list of most sustainable companies in the world, leading its industry category and marking its fifth consecutive year of inclusion in the rankings. The company performed strongly across all assessable categories, achieving 100% in the areas of sustainable revenue and sustainable investment while also improving its greenhouse gas and waste productivity scores.

Announced at the World Economic Forum conference in Davos, Corporate Knights' annual ranking assessed 8,359 publicly traded companies with revenues exceeding US\$1 billion, based on the social and environmental impact of their operations, revenues and investments.

Graham Chipchase, Brambles Chief Executive Officer said: "This is an outstanding achievement in a competitive landscape where the growing ambition of companies are pushing ever higher standards in sustainability. The momentum for change is challenging what it means to be a sustainable business in a world where growth and value creation remain just as vital.

"For Brambles and our operating company CHEP, this recognition speaks to the successful, cross-sector collaborations we've built with customers, partners and suppliers to align on sustainability goals, and the unwavering support from employees and stakeholders who share our long-term vision to build a regenerative supply network."

Toby Heaps, CEO of Corporate Knights said: "Brambles, through its unique business model of promoting the sharing, repairing and reuse of pallets, shines as the world's top ranked company which promotes circularity, a hallmark of a sustainable economy."

Brambles' sustainability performance was also underscored in the latest release of the Dow Jones Sustainability World Index, ranking #2 in its industry category and marking the 11th consecutive year as an index constituent.

About Brambles

Brambles Limited (ASX: BXB) Brambles is a global provider of logistics solutions, connecting the world's supply network through its operations, people and technology.

Brambles operates across more than 60 countries primarily through its CHEP brand, harnessing its industry-leading expertise and the unmatched scale of its asset pool of 347 million pallets, crates and containers through a network of more than 750 service centres. Through its regenerative ambition, built on decades of leadership in the circular economy, Brambles has become one of the world's most sustainable companies.

Since its origin in 1875, Brambles has been at the forefront of innovation. Today, it continues to invest in the future, developing technologies, digital solutions and partnerships to unlock new value and make the world's supply network more resilient and regenerative.

Brambles is listed on the Australian Securities Exchange and an ASX50 constituent. The Group employs approximately 13,000 people, with its largest operations in North America and Europe. For further information, please visit brambles.com

What is the Global 100?

Since 2005, the Global 100 has been one of the world's most valued and transparent rules-based sustainability ratings that emphasizes the impact of a company's core products and services. It is the best-performing global sustainability index (ticker: CKG100), with more than 10 years of history. All publicly traded companies with more than US\$1 billion in revenue are assessed across 25 key performance indicators (KPIs) covering resource management, employee management, financial management, sustainable revenue and sustainable investment, and supplier performance. Companies engaging in "red flag" activities such as blocking climate policy and contributing to deforestation are disqualified. Our methodology illuminates the "say-do" gap. Only those companies making sustainable solutions a core part of their business offerings and allocating meaningful investments to reduce their carbon footprints make the grade.
