

# Brambles Sustainability Highlights 2019

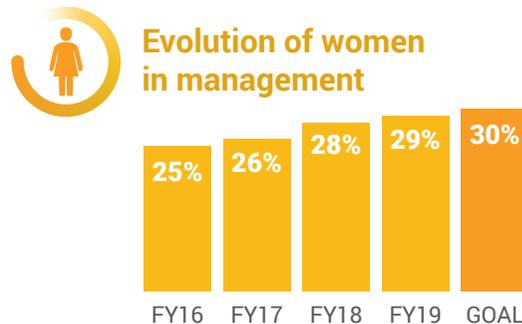

## Shaping a Sustainable Future

Brambles creates better supply chains by helping customers deliver life's essentials, sustainably.

In practice, this means transitioning customers from single-use or one-way packaging to reusable packaging.

This eliminates waste and reduces demand on natural resources, accelerating the evolution to a circular economy.

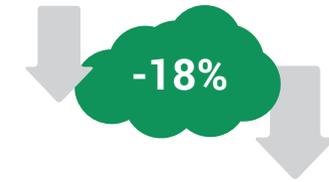

When we amplify the benefits by continuously sharing and reusing our platforms across collaborative networks in each region, we truly create better supply chains on a global scale.

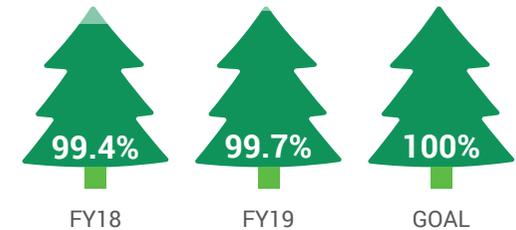

### Customers Sharing and Reusing our pallets and RPCs saved:

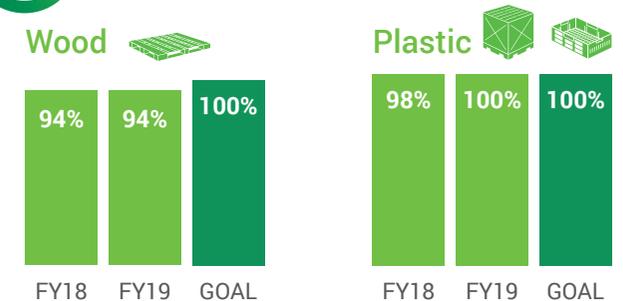

### Carbon reduction per unit delivered including 60% of electricity from certified renewable sources

### Certified Sustainable Materials Sourcing

### Sites achieving Zero Waste

### Total community investment 22% increase in community contributions

\* See Brambles Sustainability Review 'Safety Differently' story on page 17 to see how we are addressing safety performance

## ESG Recognition

Brambles continues to achieve consistently high scores in reputable investor surveys, receiving recognition as an ESG leader. Here, we offer a snapshot of ESG ratings including Brambles' performance for the year reviewed.

## ESG Roadshows

During FY19, Brambles completed ESG roadshows throughout Europe, North America and Australia, which provided the business an opportunity to share our sustainability story and learn what's important for investors ranging from institutional pension funds to sustainability focused impact funds.

The key themes arising from these conversations included the importance of sustainability issues for retail customers and food producers such as waste packaging, climate change, and regulations around human rights and slavery in supply chains. We also discussed what's next for Brambles' sustainability journey including how we can continue to lead the transition to a circular economy.
