

## Resilience & Regeneration

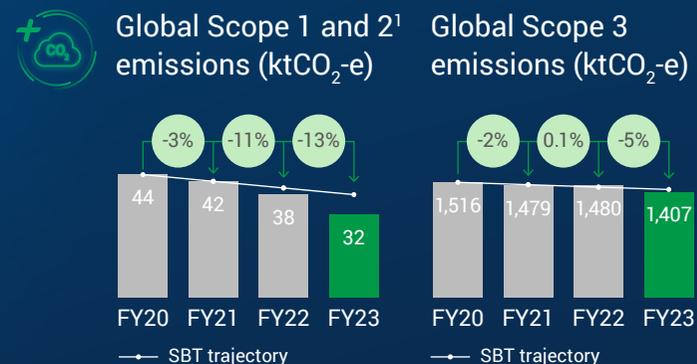

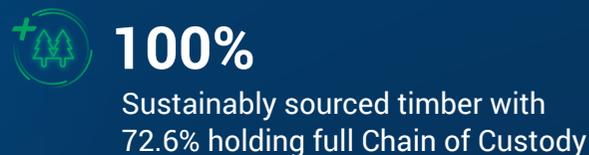

### Sustainability Highlights FY23

Building on our global leadership position in sustainability, Brambles has achieved tangible progress against its ambitious 2025 sustainability targets.

Regeneration is about delivering life's essentials every day, but in a nature and people positive way. Reuse, resilience and regeneration are at the core of this vision and are embedded in Brambles' business.

Customers sharing and reusing our pallets and RPCs saved:

<sup>1</sup> Brambles' renewable electricity results include electricity from renewable contracts 39%, on-site generation 3% and Energy Attribute Certificates (EACs) 58%.

## Implementing sustainable practices and certifying new sources in South Africa

Brambles' strategic approach to achieving our Forest Positive Targets includes a regenerative forestry programme that enables the sustainable growth of two trees for every one used. Brambles has recently obtained 10 new timber farms in South Africa, which cover a total of 3,950 hectares with roughly 3.85 million trees, through its CHEP Sub-Saharan Africa business.

### Regeneration in action

The Tabasco Regeneration Forestry Project radiates as a model of regenerative transformation.

In the heart of the Tabasco state in Mexico, a remarkable journey of regeneration is unfolding. The project is not only shaping and revolutionising our approach to timber procurement but also making our regenerative vision a reality with the environmental benefits and social value that is being generated through this flagship project.

Watch key stakeholders discuss the regenerative forestry project whilst visiting the Gmelina tree plantations in Tabasco.

### Asset Productivity Enhances Our Circularity

Asset productivity and efficiency are crucial to the success of circular businesses. Brambles is pushing the boundaries of possibility through initiatives that increase asset sharing, reuse and recovery. This preserves the value of our manufactured capital (pallets and containers) while conserving natural capital through reduced demand for raw materials.

#### Total savings:

<b>52,320</b>	<b>465,520</b>	<b>253,000</b>
tonnes CO <sub>2</sub> -e	m <sup>3</sup> timber	tonnes waste
